Ph.D, Computer Science, 1982 - 1985

Jami'at Baghdad
master of operation research and math., geometric Programming, 1976 - 1978

Ahmad Aljaber

Quality Assurance Consultant (Higher Education) at Arab Union Universities

---

2 people have recommended Ahmad

"Excellent international expertise in quality assurance in higher education"

— **Abdelrahim H.**, *President, The University of Jordan*, managed Ahmad at The University of jordan

"I had the pleasure of teaching at King Abudllah II School of Information Technology, Univ of Jordan, upon returning to Jordan from the Silicon Valley in 2000. Professor Ahmed Aljaber was my colleague and supervisor. He worded hard to found the school whenIT became an important sector in Jordan. He also was the chairman of computer science prior to being the Dean of the School of IT. Dr. Ahmad is one of the best people I have seen in Jordan in management and planning as well as being fair and neutral away from nepotism and favoritism, which are rare these days. He was also technically an excellent professor that the students and professors liked. I got to appreciate Professor Aljaber a lot more after I worked in other universities in Jordan or for other supervisors. The contrasts stood way high."

— **Dr. Hussein Al-Omari**, *Adjunct Associate Professor, The University of Jordan*, reported to Ahmad at The University of Jordan
